DT Carpentry Contracting

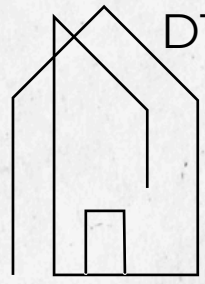

DT CARPENTRY

PROCESSES

MATERIALS

INNOVATIONS

Welcome to DT Carpentry

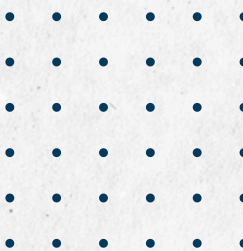

DT Carpentry was established during the pandemic to help the GTA community continue to build luxurious homes.

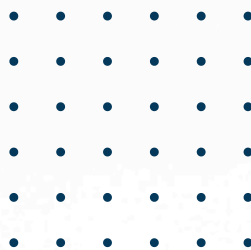

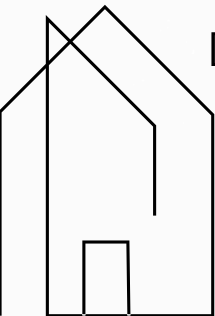

The owner & founder Andrew Tomkinson, does not take a back seat to his projects. He organizes each project, ensuring the timeline is efficient and concise.

The idea of DT Carpentry started as a passion based on a vast number of past experiences. DT Carpentry brings the integrity back into contracting.

Company Overview

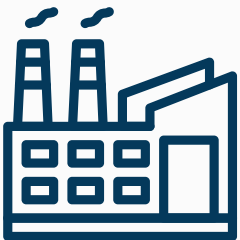

Residential

Our current modalities and professionalism transpire in the wealth of the GTA. We have provided the elite with a custom framing experience.

Commercial

Our business ethics provide commercial projects the flexibility needed to create a timeline that provides everyone with a profitable outcome.

Industrial

The expansion into the industrial world is a goal of DT Carpentry. We would like to see larger projects completed efficiently that provide optimization.

Our Modalities

Custom Framing

This service provides clients the opportunity to have any challenge successfully solved by using DT Carpentry's vast experience and knowledge.

Structural Steel Installations

DT Carpentry encourages the use of structural steel within custom home designs. This service is used to scale homes with structural loads while working alongside framing.

Major Renovations

DT Carpentry uses its problem-solving skills to convert a home from using structural bones to then creating something new and desirable.

Sustainability

- ▶ The on-site application allows DT Carpentry to focus on the moving parts of the project. Thinking on demand is a valuable asset that is used in each project.
- ▶ The traditional and modern techniques/ materials used create sustainability of dimensional lumber, laminated products, engineered wood, bone structure, ICF, panelization, and steel.
- ▶ DT Carpentry's featured projects involve bringing architectural designs and clients' visions together in a sustainable way.

Project Safety

All employees of DT Carpentry are trained with site safety protocols, CGL insurance, and WSIB, have obtained appropriate certifications, and own personal protective equipment.

Common Challenges

Cost Overruns

DT Carpentry works with our clients to create a manageable budget.

Delays

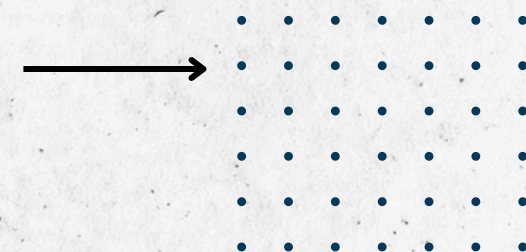

DT Carpentry creates a detailed timeline that is reviewed and approved by our clients.

Quality Control

DT Carpentry guarantees the use of products that sustain quality.

Future Trends

As we proceed through life post covid, we are still faced with the challenges of contracting. DT Carpentry is working diligently to continue to create and sustain excellent rapports with excellent results.
